Patient Check List

- Someone needs to accompany you to and from the facility because you will not be allowed to drive until 12 hours after the procedure. This is because medication will be given to you to help you relax during the test.
- **Prescription blood thinners (Coumadin, Plavix, Aggrenox) and iron preparation** must be **stopped 5 days prior** to the procedure (aspirin is okay to take unless specifically instructed otherwise).
- All other medication can be taken **on its normal schedule** with sips of water.
- **DIABETIC PATIENTS: please take only half of your scheduled insulin and no diabetic pill on the day of the procedure.**
- If you use a **C-PAP** machine **please bring it with you** on the day of your procedure.
- If you use a **Nebulizer**, please **do a breathing treatment before** coming in for your procedure.
- If you use an **Inhaler**, **bring it in with you** on the day of you procedure.

Day before Procedure:

Nothing to eat or drink after midnight. If you are thirsty, take small sips of water or eat chips of ice.

Day of the Procedure:

Nothing to eat or drink until your procedure is completed. No smoking or eating or chewing anything for two hours after the completion of your procedure
